It's Your Data You Should Get Paid For It

5th BONUS - Video

Video Marketing is here and here to stay. It is and will remain the #1 method of any marketing of any business.

However, we know there is a segment in the population that hold these 2 beliefs:

- a. Don't want to personally be on camera visibly
- b. Don't want to personally be on a video with their voice

Good news! We have you covered on both ends. How?

1. Use MS Office for FREE and use PowerPoint for free – this way you do not have to be on camera (unless you want to) and File/Export as a Video.
2. Use Shotcut video editor (see below) to edit, and a voiceover, sound effects or music background. Totally free.
3. Use Pexels to find free graphics or videos to import into your video.
