It's Your Data You Should Get Paid For It

6th BONUS - Graphics

GRAPHICS are extremely helpful in marketing. There is an old saying that applies that says “A Picture is worth a thousand words.”

You can use graphics (pictures) on Facebook, Instagram and any social media site. But also in videos, on business cards, greeting cards, video thumbnails and much more!

You will find millions of non-copyright graphics with a simple internet search in addition to Pexels (mentioned in our last bonus).

You can you edit these graphics with programs like LunaPic, PicResize or Picmonkey (see links below).

One of the features I like with Lunapic is the easy way to crop a picture or graphic in a circle.

Picmonkey has a nice feature in “touch up” that allows you to whiten teeth. Maybe not for yourself, but if you make graphics for others this can be a very nice touch and it's so easy to do.

Maybe you want to host a picture online, but you do not have a domain to host them on. You can use Imgur to host your pictures for free.

HERE ARE TODAY'S BONUSES FOR YOU:
