9th BONUS – QR Codes

Welcome back! I'm glad to see you're enjoying our bonuses.

We are all seeing more and more QR-codes in advertising and sharing information and they look like this:

This one is brown with a monkey, but you can make them in any color any image and any background color.

Once the QR-code is scanned by your cell phone camera or “QR-code Scanner” app on your phone, you are immediately taken to that website or information. Very fast and no typing needed.

“QR-code Monkey” is probably the most popular and most versatile of them all.

QR-code Monkey is very intuitive, flexible and easy to use, so you may not need a tutorial for this. But in case you need a video tutorial for QR-code Monkey, simply go to <https://youtube.com> and search on “QR-code Monkey Tutorial and there are many video tutorials there in multiple languages.

HERE ARE TODAY'S BONUSES FOR YOU:
