

A self-replicating website is most helpful to YOU, because you and all your paid affiliates will be able to change your name anytime you want, without contacting me to do it.

Sometimes people get married or divorced and change their name. Or they want to change William to Bill. Or they want to add their spouse's name to theirs. Or they want to change their first and last name to a business name.

Sometimes people change their phone number or email address, and you can change that yourself on a self-replicated website.

---

ALSO, a self-replicated website is beneficial to you AND TO ME .. because when we need to change the TEXT on the webpage, I can change it on the master webpage and instantly everyone's page is updated.

This saves me days of work updating pages.

This also means the many paid affiliates who have no idea how to change a webpage content will instantly have it updated for them. Nice!
